

Wenting Shi

1640 Cedar Springs Cir, Clarksville, TN 37042

Phone: (626)782-3631

Email: swt0117@gmail.com

SKILLS

Data Engineering: Databricks (PySpark, SQL), ETL/ELT Pipelines, Medallion Architecture (Bronze/Silver/Gold), Performance Tuning.

BI & Visualization: Tableau, Power BI (DAX), Qlik Sense, MicroStrategy.

Data Science: Python (XGBoost, Scikit-Learn), R (Shiny), SAS, AI/ML Modeling, A/B Testing.

EXPERIENCE

The Cigna Group

Remote

Senior Business Intelligence Engineer

01/2023-present

- **BI Modernization:** Led the enterprise migration from **Qlik Sense to Tableau/Power BI**; designed a gold layer (curated data) within **Databricks** to optimize query performance, data governance, and self-service analytics.
- **Data Engineering:** Engineered scalable **ETL/ELT pipelines** in **Databricks (PySpark, SQL)**, optimizing **query performance** and reliability for analytics and visualization workloads.
- **Process Automation:** Developed and deployed an **R/Shiny** application to automate high-complexity Excel workflows, transforming a mission-critical reconciliation process from **40 hours to 1 hour** (97% efficiency gain).
- **Predictive Modeling:** Architected an **XGBoost** "Likelihood to Sell" model that increased close ratios by **10%**; engineered production pipelines in **Databricks** to score RFPs four times daily, reducing underwriting manual workload by **50%**.
- **Stakeholder Partnership:** Partnered with **product, marketing, and underwriting leaders** to define **core KPIs**, translate ambiguous questions into **metrics**, and deliver executive-ready dashboards.

Amazon.com

Remote

Business Intelligence Engineer

11/2021-01/2023

- Developed and optimized **ETL pipelines** using **SQL**, Amazon DataGrip, and Redshift
- Ensured data accuracy through investigating complex SQL logics and refining legacy ETLs
- Facilitated self-service analytics by curating key datasets and providing clear documentation
- Created **Tableau** and **QuickSight** dashboards to support data-informed decision-making
- Utilized **Python** for **machine learning** techniques, achieving a 10% increase in conversion rates

Merkle Inc.

Remote

Analytics Manager

11/2017-11/2021

- Data and analytics expert for clients in finance and healthcare industries, specializing in data consolidation, data analysis, and model development
- Proficient in **Python** and **R**, developed predictive models using regression, random forest, and XGBoost algorithms to increase funnel conversion rates
- Compiled data from multiple sources and built ETL pipelines, utilizing **SQL** and **SAS** to automate the process and reduce runtime by 60%
- Designed and implemented **A/B tests**, **customer profiling**, and **segmentation** analysis to measure the impact of different offering strategies (messaging, channel, etc.)
- Created deep-dive dashboards for clients' leadership team using Power BI and Tableau

GEICO

Chevy Chase, MD

Senior Product Analyst

05/2016-11/2017

- Partnered with vendors and internal teams to introduce and validate new data sources
- Initiated, designed and implemented analytical and quantitative solutions for product enhancement projects
- Leveraged advanced statistical methods (**predictive models**, **segmentation analysis**, **cluster analysis**, etc.) to enhance the use of 1st party and 3rd party information

Cummins Inc.

Columbus, IN

Business Analyst

07/2014-05/2016

- Developed **ETL** processes using **SQL, SAS**, and Advanced Excel
- Provided analysis and reporting with Microsoft Business Intelligence tools
- Created BI training materials and led company-wide training sessions covering North America, Europe and Asia

EDUCATION BACKGROUND

Purdue University, West Lafayette, IN

Jan 2011 - May 2014

Major: Bachelor of Science in Mathematics/Statistics

GPA: 3.70/4.00

Minor: Computer Science, Management
