Phone: (626)782-3631

Email: claireshi0910@outlook.com

SKILLS

BI & Visualization: Tableau, Power BI (DAX), Qlik Sense, MicroStrategy, QuickSight

Data & SQL: Advanced SQL, Dimensional Data Modeling, ETL/ELT, Data Warehousing

Tools & Languages: Python, R, SAS, Databricks (PySpark), Excel, A/B Testing

EXPERIENCE

Ant Technology LLC.

Rockville, MD

Business Intelligence Engineer

01/2026-presents

- Partnered with program, finance, and operations stakeholders across **government, insurance and healthcare** clients to define **KPIs** and turn ambiguous requirements into **executive dashboards**.
- **BI Modernization:** Led the migration from legacy **SAS/Excel** reporting to **Tableau** and **Power BI**, and designed a curated, dimensionally modeled data layer in **Databricks** that cut report query times by 20%.
- Built governed semantic models with reusable **DAX** measures in **Power BI**; and certified, **LOD-based** data sources in **Tableau**; giving client teams consistent, self-service metrics secured with **row-level security** and aligned to **data governance** and **compliance standards**.
- **Data Preparation:** Built and maintained **SQL/PySpark data pipelines** in **Databricks** to consolidate source data into clean, analysis-ready tables for Tableau and Power BI reporting.
- Authored and tuned complex **SQL (CTEs, window functions, stored procedures)** to build certified datasets, and delivered analytics in two-week **Agile sprints** with requirements gathered directly from non-technical government and business users.

Merkle (Dentsu Group)

Remote

Lead Data Analyst

07/2014-11/2024

- Served as the lead analytics partner for **finance, insurance and healthcare** clients over 10 years, owning end-to-end delivery from **data preparation** through **executive dashboard** and **predictive model**.
- Built **ETL pipelines** in **SQL** and **SAS** to consolidate data from multiple sources and **automate reporting, reducing runtime by 60%**.
- Designed dimensional data models and wrote complex **SQL (multi-table joins, window functions, aggregations)** to turn raw campaign and customer data into analysis-ready datasets.
- Designed and ran **A/B tests, customer profiling, and segmentation analysis** to measure the impact of messaging, channel, and offer strategies.
- Built and maintained executive dashboards in **Power BI and Tableau (DAX measures, parameters, drill-downs)** that gave client leadership self-service visibility into campaign performance KPIs.
- Developed predictive models in **Python and R (regression, random forest, XGBoost)** that increased funnel conversion rates by 18%.

EDUCATION BACKGROUND

East China Normal University, Shanghai, China

Jan 2011 - May 2014

Major: Bachelor of Science in Mathematics/Statistics

Minor: Computer Science, Management
